

ESG Readiness Report

Assessment 16/5/2026 · 17 May 2026
Assessment ID: 6a089bfa551e95f86afe13fd

31	43	20	16
Overall Score	Energy	Water	Waste

1. Organisation Profile

ASSESSMENT NAME	Assessment 16/5/2026
SECTOR	TEXT
BUILDING AREA	23 sqft
STATUS	draft
GENERATED	17/5/2026, 2:01:52 pm

2. Data Upload Summary

CATEGORY	MONTHS	SOURCE	UPLOADED AT
Electricity	8	excel	17/5/2026
Water	8	excel	17/5/2026
Fuel	7	excel	17/5/2026
Waste	7	excel	17/5/2026

3. Emissions Summary (tCO2e)

SCOPE 1	SCOPE 2	SCOPE 3	TOTAL
16.03	0	1.75	17.78

4. KPI Benchmarks

ENERGY SCORE	43
WATER SCORE	20
WASTE SCORE	16
GOVERNANCE SCORE	40
OVERALL SCORE	31
READINESS STAGE	Foundational

5. Certification Readiness Matrix

FRAMEWORK	SCORE	TIER	TIMELINE	PREREQUISITES
ISSP_CORE	40.58%	Bronze	12+ months	Met
ISO_14001_EMS	39.23%	Bronze	12+ months	Met
ISO_50001_ENMS	46.63%	Silver	12+ months	UNMET
BRSR_CORE	40.78%	Bronze	12+ months	Met
GRI_STANDARDS	44.17%	Bronze	12+ months	Met
CDP_CLIMATE	54.6%	Silver	12+ months	Met

6. Regulatory Readiness

REGULATION	SCORE	RISK	APPLICABLE	NOTES
GHG Protocol	88%	Low	Yes	Emissions tracking is adequately covered.
ISO 14001 EMS	31%	High	Yes	Severe lack of environmental management governance and track
SEBI BRSR	41%	High	Yes	Missing fundamental disclosures required by SEBI.
EU CSRD	0%	N/A	No	Not applicable for this sector/country.
Singapore GreenMark	0%	N/A	No	Not applicable for this sector/country.

7. Strengths & Gaps

Strengths

- Renewable contribution materially exceeds the baseline target — strong decarbonisation signal for certification narratives.
- Measured recycling rate clears the 60% benchmark used for readiness dashboards.

Gaps

- Energy intensity exceeds the upper benchmark — efficiency retrofits or sub-metering should be prioritised.
- Overall ESG score is in the foundational band — cross-functional remediation is required before certification submissions.
- No certification pathway currently clears the eligibility score — address prerequisite gaps flagged in the certification matrix.
- Governance score is below the structured threshold — assign ESG ownership, formalise SOPs, and document reviews.
- Composite energy score is materially below peer readiness — revisit intensity, renewables, and monitoring flags.

8. Executive Summary

Based on the operational data provided, the organisation currently scores 31%, placing it in the "Foundational" readiness stage. Key strengths include: Renewable contribution materially exceeds the baseline target — strong decarbonisation signal for certification narratives.; Measured recycling rate clears the 60% benchmark used for readiness dashboards.. Primary gaps include: Energy intensity exceeds the upper benchmark — efficiency retrofits or sub-metering should be prioritised.; Overall ESG score is in the foundational band — cross-functional remediation is required before certification submissions.; No certification pathway currently clears the eligibility score — address prerequisite gaps flagged in the certification matrix..

DISCLAIMER

This assessment provides an indicative readiness evaluation based on self-reported data. It does not constitute formal certification, regulatory assurance, or legal advice. Results should be independently verified before being used for compliance filings.
